

MULTI SPAN

FOR ENGINEERING & CONSTRUCTION

- Since 2011, multi span for engineering and construction factory started its activities in Egypt, it is located at Belbeis city, on 2250 M2 area.
- Multi span for engineering and construction building construction business principals of quality, service and value in safe way.
- We have always been dedicated to provide high quality services with our client's budget and time frames, in addition to the general constructions.
- We provide custom designed service as construction management.
- Multi span for engineering and construction is an engineering manufacturer and contracting group, working mainly in the fabrication and constructing of pre-engineering buildings, caravans, fruits refrigerators.
- We are capable of handling a full control on turnkey projects.

Our vision:

To become an international steel company that helps clients to achieve their goals

Our mission:

To supply our clients with designs and high-quality steel products at competitive prices.

We will accomplish our mission through our commitment with growth strategy, outstanding manufacturing techniques, and after sale service.

Our products:

Multi span for engineering and construction experience in steel industry which contains four main divisions;

A) Steel structure

1. Pre engineering buildings.
2. Mezzanine, stairs, multistory and crane girders.
3. Refrigerators.

B) Overhead cranes

1. Supply and erection overhead cranes.
2. Maintenance overhead cranes.

C) Cladding:

1. Standing seam system.
2. Single layer sheet panel.
3. Sandwich panels.
4. Steel shade.

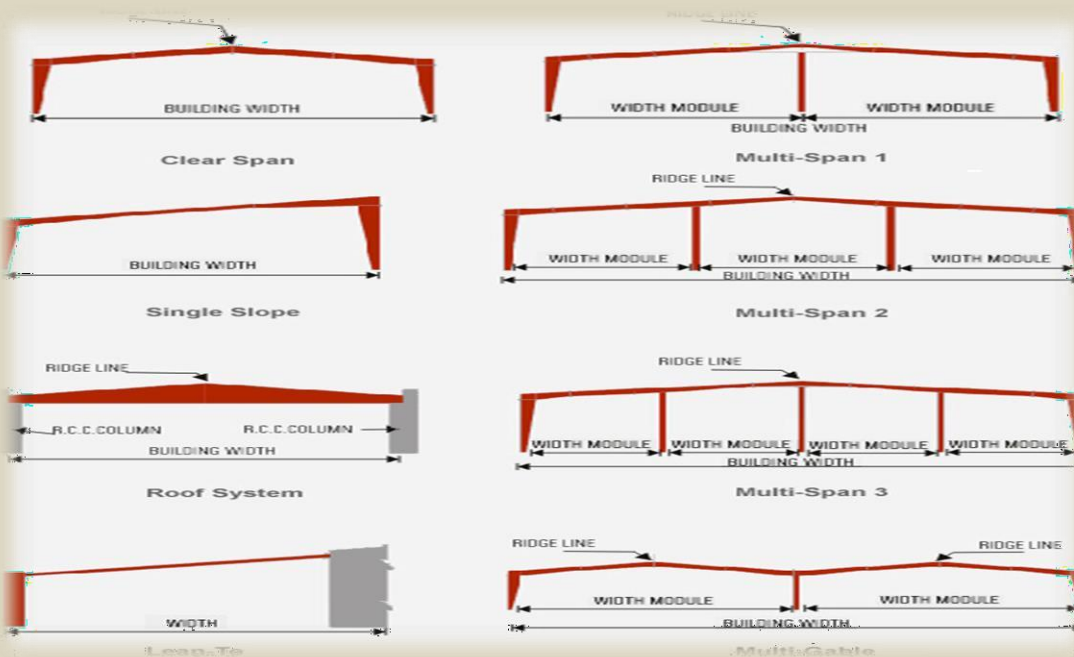

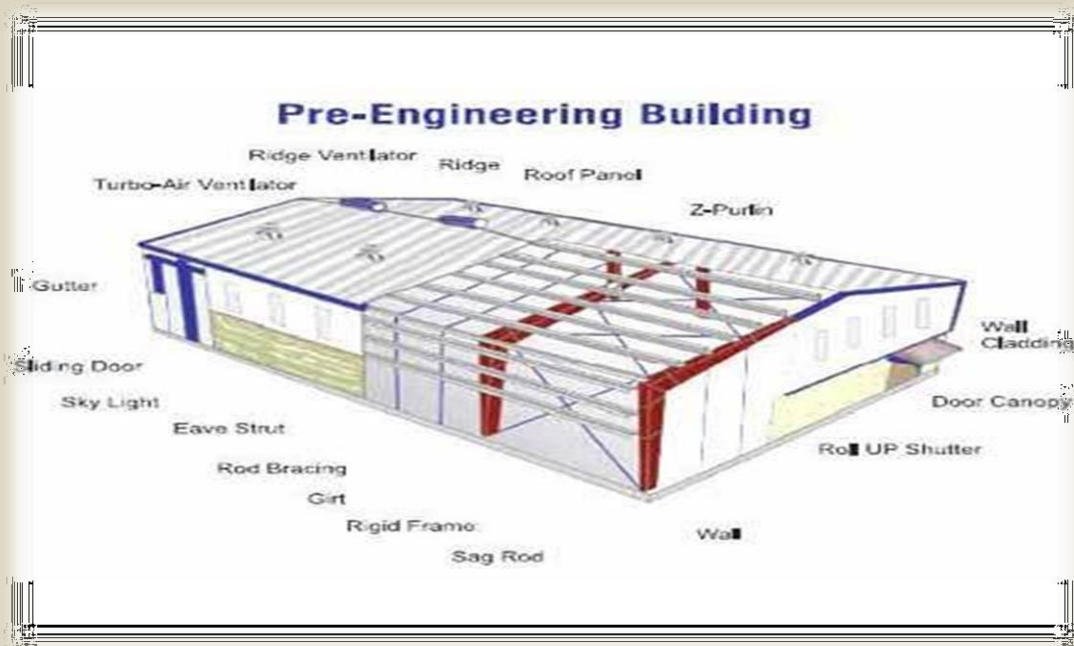

D) Pre- fabrication units

1. Pre-fabrication units (offices, rooms, dining and bath room).

A) STEEL STRUCTURE:

1- Pre-engineering buildings

Mansour Chevrolet

Location: Al Amriya– Alexendria

Project : supply of steel building

Scope of work : fabrication and install 80 ton of steel building

Factory of 100 Military

Location: Abou Zaebal – Cairo

Project : supply of steel building

Scope of work : fabrication and install 220 ton of steel building

Pepsi

Location:

- Damanhour

Project :

- hunger installation

Scope of work :

- install 130 ton of steel structure

Ware house ALLA AMIN

Location:

- 6 of October

Project :

- Hunger installation

Scope of work :

- Install 400 ton of steel structure

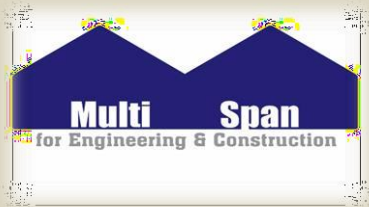

WALILI

Location: Borg el arab -alexandria

Project : Hunger installation

Scope of work : Install 180 ton of steel structure and 12000 M2 of sigle sheet

Aresco

Location: Phosphate factory - Ain sokhna

Project : Carbon steel ducts installation

Scope of work : Install 300 ton of carbon steel ducts

Chint for solar energy

Location: Aswan city

Project : supply of steel building

Scope of work : fabrication and install 30 ton of steel

Water Valley Company

Location: Sadat city

Project : supply of Mezzanine steel

Scope of work : fabrication and install 265 ton of steel

United Brothers Company

Location: Sadat city

Project : supply of steel building

Scope of work : fabrication and install 150 ton of steel

Beauty Lab Factory

Location: Fayoum city

Project : supply of steel Multistory

Scope of work : fabrication and install 120 ton of steel Multistory

Sinoma

Location: Ain sokhna

Project : fabrication and install of steel

Scope of work : fabrication and install 2,000 ton of steel

Hassan Allam Construction

Location: Administrative Capital

Project : supply of steel louvers

Scope of work : fabrication and install 120 ton of steel

Tatweer Factory - Animal Food Products Development

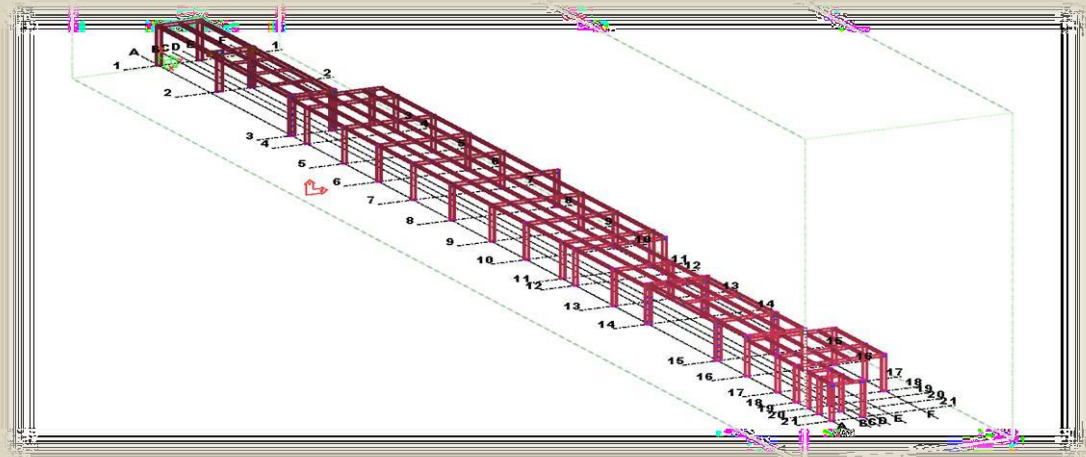

Location: Fayoum city

Project : supply of steel tower

Scope of work : fabrication and install 20 ton of steel tower

2- Mezzanine, stairs, handrails and crane girders

CocaCola

Location:

- 6 of October

Project :

- mezzanine

Scope of work :

- fabricate and install 95 TON of steel mezzanine

EZZ flat steel factory

Location: Ain el sokhna

Project : Hand rills ,stairs and walk way

Scope of work : Install 3000 ton of stel structre

3- Refrigerators.

ELWALILI GROUP

Location: Borg Al Arab -Alexandria

Project : Cold store -10C

Scope of work : Install 2700 M2 of sandwich panel and required machines

B) OVERHEAD CRANES:

1- Supply and erection

Petrojet

Location: Ismailia

Project: Suez canal tunnels

Scope of work : supply and erection of 2 overhead 5 ton

Egypt railways

Location: Abou Wafya

Project: workshop for maintenance trains

Scope of work : Supply and erection of 2 overhead 25/5 ton

Osman Group – Pipe factory

Location: Wadi Houf – Helwan

Project: workshop for fabrication pipes

Scope of work : Supply and erection of 3 overhead 20/10 ton

2- Maintenance Cranes

Unipak Nile Egypt

Location: 6 October

Project: 13 overhead cranes

Scope of work : Maintenance of 13 overhead cranes

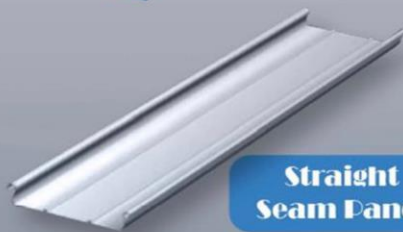

C) CLADDING:

1- Standing seam system

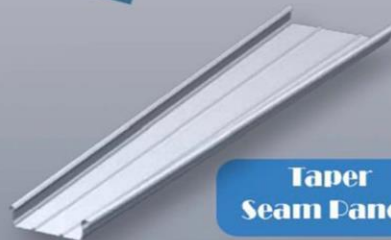

Zip-Roof 400 & 500

Straight Seam Panels

**Straight
Seam Panel**

Tapered Seam Panels

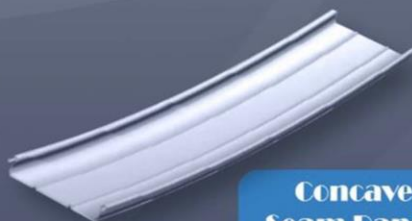

**Taper
Seam Panel**

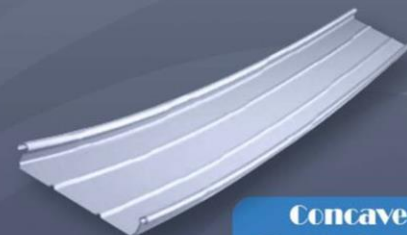

**Convex
Seam Panel**

**Convex
Taper Panel**

**Concave
Seam Panel**

**Concave
Taper Panel**

Materials

- Aluminum: Mill Finish
- Coated Aluminum
- Stucco Aluminum
- Aluminum-Zinc: Steel sheet with aluminum-zinc coating corrosion protection.
- Pre-painted Galvanized Steel in-coils (PPGI)
- Galvanized Steel

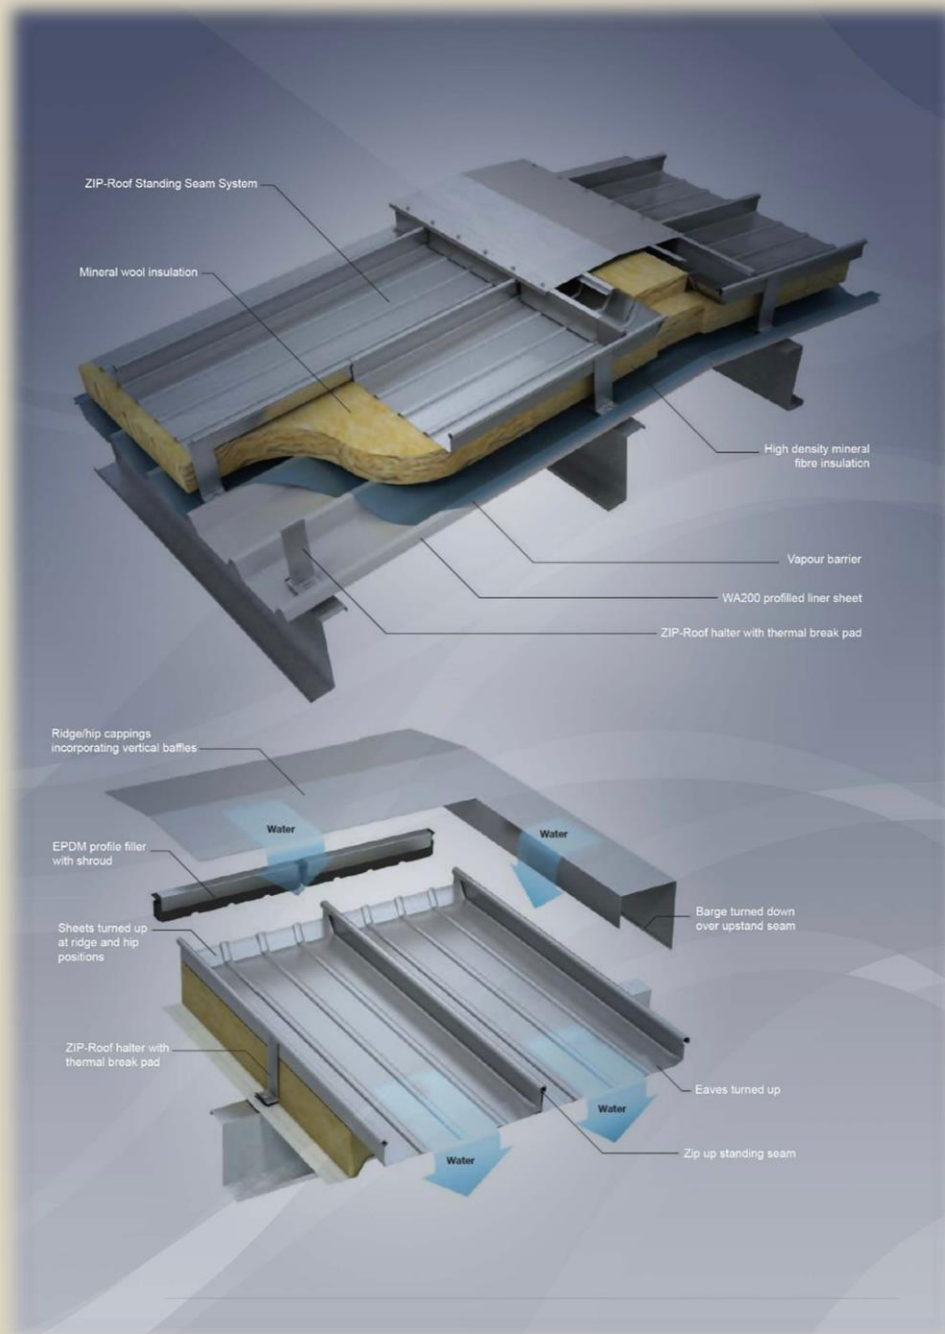

Profiles

**ZID-ROOF
400**

**ZID-ROOF
500**

2-Single layer

Mega House for construction

Location: New Cairo

Project : Warehouse building

Scope of work : fabrication and erection of steel 65 ton
with 4200 M2 of single sheet

3- SANDWICH PANELS

Payer for milling

Location: Sadat city

Project : Cladding-sandwich panel

Scope of work : Install 16000 M2 of sandwich panels

4- Steel Shade

D) PRE- FABRICATION UNITS:

Icon

Location: Kwadico -6of October

Project : Pre fabrication unit (offices)

Scope of work: Turn key project

Our Factory

We expect dedication and outstanding performance from our employees.

We reward excellence and create working conditions to entrance and foster quality performance.

We promote training, flexibility, loyalty and superior results.

We are committee as well to providing a safe and healthy workplace.

Submerging

CNC – Machine

Sandblasting

Painting

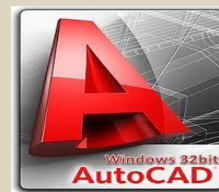

TECHNICAL OFFICE

We have professional engineers in design and detailing of steel structure failed.

Provide high quality engineering products and services to local as well as global market with qualified and well-trained engineering team in which the technical and engineering office have gained experience over the years in design, manufacturing to understand optimally clients inquires and requisitions to reach accurate solutions and proposal for the existing and predicted future projects.

Our technical office using the professional programs in designs, detailing and shop drawings such as:

- AutoCad program

- Tekla structure program

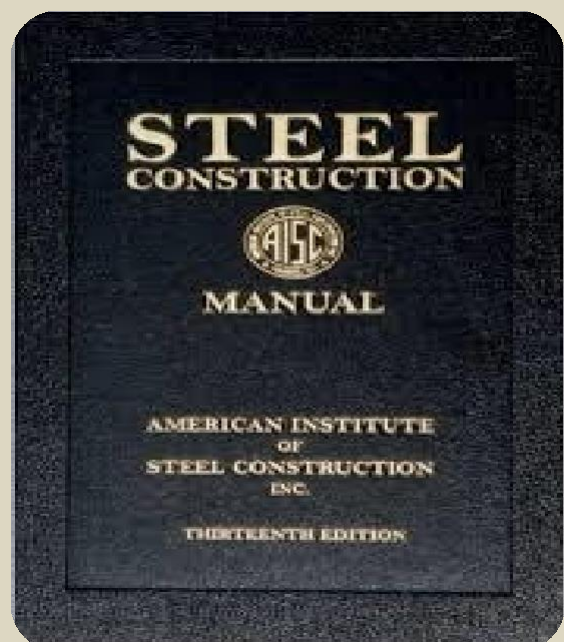

- Primavera project planner

We are using Egyptian code and American code in our technical office

Our reference:

Pharco pharm

- Steel structure on 600 M2 with sandwich panel cladding

Coca cola Egypt 6 October planet

- Mezzanines total weight 95 ton
- Time of fabrication and erection 6 weeks

Ezz DRI factory

- Steel structure total weight 3500 ton

International for animal production

- Sandwich panels on 1500M2 roof, wall supply and install

El-saedia School

- Remove old roof and install a new Sandwich panel roof 800 M2 and 250 M2 canopy

Global for decoration and interior design

- Remove old sandwich panel and install a new totally 1600 M2

EL-NILE University

- Administration building Steel structure 1200 M2

Ware house ALLA AMIN

- Install a new structure totally weight 450 ton
- Apply single sheet totally area 12,000 M2

PHARMA OVER SEAS

- Administration building Steel structure and cladding
- Steel doors and fire rated portions

Samy Ayed group

- Install steel structure 40 ton
- Remove old corrugated sheets and install a new totally 1600 M2
- Supply and installation steel shade

Tatweer Animal Food Products Development Factory

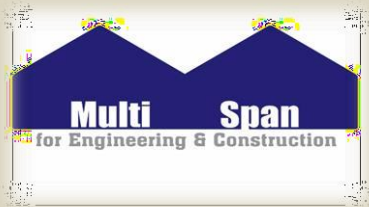

- Supply and installation steel tower 50 ton
- Supply and installation steel intake 20 ton

Aresco for manufacturing & industrial projects

- Erection for carbon steel ducts 300 ton

Mega house for construction

- Supply and installation steel building 65 ton
